Before

## Cowl Closure

Once the factory has lowered the cab, Fontaine's cowl closure will return the cab to the original OEM fit and finish.

After

Before

## Cab Suspension

The result is a clear back of cab without sacrificing a great ride. Best of all, we use original factory parts.

After

## Lower Cab to Frame

Contact your Peterbilt dealer for optimal specs for lowering the cab. This feature may be used independently of lowering the roof.

## Cab Suspension

When every inch of space behind the cab counts, Fontaine can relocate the sleeper rear suspension.

### **Experience You Can Trust**

Fontaine has been in the truck modification business for over 30 years. This experience gives us a thorough understanding of:

Industry trends

OEM platforms

FMVSS standards

We apply that knowledge and experience to every challenge our customers bring us. The solution is fully engineered before we cut, weld, or bolt-on a part. Customers are assured of the highest quality.

### Drop Frame

### Sit Down Dual Drive
